

BULLYING

PREVENTION TIPS

BULLYING is a single significant act or a pattern of acts by one or more students directed at another student that exploits an imbalance of power and involves engaging in written or verbal expression, expression through electronic means, or physical conduct that satisfies the applicability requirements provided by Subsection (a-1) of the Texas Educational Code.

CYBERBULLYING is bullying that takes place using electronic technology, such as chat rooms, instant messaging, social media, or other forms of digital electronic communication. With apps and technology changing all the time, unfortunately some use them as new ways to bully.

PREVENTION

Parents, educators, mentors, coaches, and trusted adults play an important part in a child's life when helping to mitigate and prevent bullying and cyberbullying behavior:

- Help kids understand bullying – define what it is, how it happens and how to combat and cope with it safely.
- Help create a safety plan – brainstorm ideas on what steps to take when they witness or experience a bullying situation.
- Keep the lines of communication open – check in on kids often and help them identify trusted adults and resources.
- Encourage kids to do what they love – relying on healthy protective factors can help boost confidence, make friends, and lower risk of bullying behavior or becoming a target.

CONVERSATION STARTERS

Bullying and cyberbullying often goes unreported making it difficult for parents and schools to identify and manage bullying situations. Consider the following to encourage dialogue with your student:

- What were the best two things about today and the worst two thing about today?
- If you could be a superhero and help other kids, what powers would you have?
- Ask them to describe what a bully is.
- Who are the adults you can talk to if you are scared or worried?
- What happens when you see other kids get pushed around or teased?
- What do you think parents or teachers can do to help stop bullying?
