

CHILDREN AGES 12-17 NEEDED FOR STUDY ON SOCIAL COMMUNICATION

WHAT ARE THE GOALS OF THIS RESEARCH STUDY?

The purpose of this study is to understand how children and adolescents respond to different emotions and social situations.

WHO CAN BE A PART OF THIS STUDY?

This study is open to children between the ages of 12 years and 17 years. We are looking for typically developing children as well as children who are diagnosed with autism spectrum disorder (ASD), Anxiety or Depression.

WHAT WILL PARTICIPANTS BE ASKED TO DO?

Participants will be asked to attend up to two visits to Baylor College of Medicine. Some study activities may also be completed online, over the phone, or via video call. During the first visit, or via phone/video, your child will be interviewed and may receive brief cognitive testing from one of our clinicians. If eligible, your child will complete activities and interact with our research staff which will last about 6.5 hours.

Participants will be compensated for their time and travel.

I WANT TO HELP! WHO DO I CALL?

If you are interested in participating in the study or want to learn more please contact our study coordinator:
